

VANQUISH TECH

Best-fit technology, delivered with control you can trust.

One Accountable Partnership

Vanquish Tech helps organisations simplify, secure and modernise their technology environment through one accountable partnership. Independent and vendor-agnostic, we begin with the business outcome not a preferred product, then bring together the right technologies, specialist partners and integrated delivery required to achieve it. Our governance-led approach maintains clear ownership, control and continuous optimisation beyond go-live.

One Accountable Partnership

I believe good technology decisions begin with a clear understanding of what the business is trying to achieve. Before discussing products, we take the time to understand the objective, the people involved, the current environment and how success should be measured. Being independent and vendor-agnostic allows us to advise objectively and design the solution around the outcome—not the other way around.

Our responsibility continues through implementation, adoption and the full technology lifecycle. We help clients improve performance, optimise their investments and plan ahead for change—from scaling and refresh to renewal, redeployment and responsible retirement. For me, accountability means staying focused on the intended outcome from the first conversation to the final lifecycle decision: clarity at the outset, ownership through delivery and control throughout.

ONE ACCOUNTABLE TEAM

From discovery and design to support and governance

OUR COMMITMENT:

Business outcomes first.
Best-fit technology.
Control beyond go-live.

One accountable partner. Five connected capabilities.

Across five connected capability areas, we combine independent advice, best-fit design, integrated delivery, managed services and lifecycle governance. This allows us to address the immediate business objective while keeping performance, risk, user experience and the long-term value of the investment in view.

1. Modern Workplace & Managed Services Productive, supported teams.

Secure workplace technology managed across the user and device lifecycle, helping people work effectively while reducing disruption and keeping services aligned as the

2. Infrastructure, Cloud & DevOps Reliable, scalable foundations.

Resilient cloud, hybrid and on-premises environments designed for performance, security and growth, bringing together infrastructure, networking, backup, recovery and DevOps capabilities.

3. Cyber Security & Resilience Reduced risk. Greater resilience.

Resilient cloud, hybrid and on-premises environments designed for performance, security and growth, bringing together infrastructure, networking, backup, recovery and DevOps capabilities.

4. AI & Automation Responsible automation. Measurable value.

AI and automation introduced around a clear business objective, with data, permissions, adoption and governance considered from the outset and performance optimised over time.

5. Unified Communications & Audio Visual Connected, consistent experiences.

Integrated voice, video, collaboration and meeting-room environments designed around how people communicate and work, supported through design, engineering, delivery and ongoing management.

HOW WE WORK

Applied across every capability.

Assurance isn't a badge. It's how we operate.

Independent advice and best-fit technology only create value when delivery is secure, controlled and accountable. Our governance model, certified management systems and responsible lifecycle practices are embedded in how we advise, deliver, manage and improve technology—from the initial objective to final

1. Governance & Control

Delivery remains visible, structured and accountable.

- Structured reviews covering performance, risks, actions and improvement.
- Transparent reporting across services, incidents, requests and change.
- Clear ownership, timelines, decision records and escalation routes.
- Active risk, issue, change and continuity management.
- Continual improvement and lifecycle planning reviewed over time.
- Service governance that maintains alignment, accountability and consistent delivery.

2. Certified Management Systems

Productive, supported teams.

ISO 9001: Quality Management

ISO 27001: Information Security Management.

ISO 22301: Business Continuity Management.

ISO 14001: Environmental Management
Additional assurance and commitments.

Cyber Essentials certified: baseline technical security controls.

Safe Contractor Approved: independently assessed health and safety practices.

ICO registered: accountable data-protection practices.

Disability Confident Committed: inclusive recruitment and employment practices.

3. Responsible Technology & Business

Responsibility is considered throughout the lifecycle.

Outcome-led recommendations designed to avoid unnecessary technology, cost and waste.

Ethical sourcing, appropriate due diligence and clear asset accountability.

Forward planning for refresh, renewal, redeployment and retirement.

Secure collection, asset tracking, data erasure, reuse, resale and responsible recycling.

Digital inclusion through the secure repurposing of suitable technology.

Community involvement, volunteering and charity support through Vanquish Cares.

Specialist circular lifecycle services are supported through our relationship with KOCycle.

WHAT CLIENTS CAN EXPECT

1

Best-fit recommendations shaped by business objectives, not vendor alignment.

2

Clear ownership and transparent reporting throughout the engagement.

3

Secure, resilient and documented delivery.

4

Better performance and value from technology investments.

5

Ongoing optimisation and forward lifecycle planning.

6

Responsible handling of data, assets and end-of-life technology.

VANQUISH CARES

Responsibility beyond technology.

Through Vanquish Cares, our people support volunteering, fundraising, digital inclusion and selected community initiatives. Where appropriate, we also help suitable technology begin a second life through secure repurposing for charities and community projects.

Our aim is practical, lasting contribution, giving our time, sharing our expertise and using technology responsibly to support people and communities.
